

ΣΑΠ GREEK SHIELD CERTIFIED

Greek Life has made important strides in addressing substance use, sexual assault, hazing, and mental health through education initiatives. However, what remains largely unaddressed is the physical safety of fraternity and sorority housing and the surrounding areas where many colleges and universities exist.

Greek Shield Certified fills that gap by providing a comprehensive safety initiative uniquely tailored for fraternities and sororities. By partnering with Secure Environment Consultants, Greek Life organizations can proactively enhance the safety and security of their members, fostering a culture of preparedness and resilience.

Three Pillars of Safety

Our proven model centers on three essential pillars. Without these foundational steps, even the best intentions around wellness leave a critical gap in protection. With Greek Shield Certified, our consultant spends one day at your chapter house to conduct a risk assessment and provide on-site training for members and staff, which is then followed by a detailed plan and debrief about your house.

VULNERABILITY ASSESSMENT

Comprehensive evaluations of fraternity and sorority housing to identify vulnerabilities and recommend improvements.

EMERGENCY PLANNING

Customized plans addressing potential risks, ensuring preparedness and a swift response.

MEMBER & STAFF TRAINING

Interactive sessions focusing on critical incident response, de-escalation techniques, and situational awareness.

Safety is Not Negotiable

No matter the chapter size or budget, protecting members is a universal need.

Implementing structured safety programs reduces risks and demonstrates a commitment to member health and safety. Today's landscape does not allow for a "head in the sand" approach. National leadership plays a crucial role in setting safety standards and expectations. In the event of an incident, members will look to leadership — and hold them accountable. It's critical to get ahead of any potential safety incidents.

Ongoing Support

With SEC Greek Shield, our support after the initial assessment and training continues — giving you access to our team's experience.

Houses receive a specialized safety toolkit, emergency protocol signage, and access to our eSEC Online Platform — a robust library of training modules — for continuous learning. Additionally, we regularly update content to address emerging threats and incorporate best practices. Finally, our experts are always available for guidance and support, including a minimum biannual check-in.

Why Secure Environment Consultants?

SPECIALIZED EXPERIENCE

SEC's team includes former U.S. Secret Service agents and federal law enforcement professionals, offering real-world insights into threat assessment and prevention.

COMPREHENSIVE APPROACH

Our methodology goes beyond standard physical security principles, integrating layered security measures tailored to the unique dynamics of Greek Life.

PROVEN TRACK RECORD

SEC has successfully partnered with organizations across the nation, including educational institutions, to enhance safety protocols through realistic recommendations.
